

Performance Under Gear

PUC's base-layer clothing is made from Coolmax Extreme freshFX fabric, which retains 14 times less moisture and dries four times quicker than cotton, wicking away moisture and keeping you dry in hot weather. The material is highly breathable and has a brushed interior for added comfort. The freshFX fabric uses silver-based technology to inhibit bacteria growth and reduce odors. Shown here are the company's compression garments, which are made from 94-percent Coolmax fabric with 6 percent lycra for a skin-tight fit. A line of relaxed-fit wear is also available, as are a skull cap and balaclava.

Sizes: XXS-3XL

Suggested retail price:
\$30.99 (shorts), \$50.99
(leggings),
\$50.99 (long-sleeved top)
